DETAILED ACTION

1. This communication is in response to the Continued Prosecution Application (CPA) request transmittal and the preliminary amendment filed on February 27, 2002.

Status of Claims

2. Of the original claim 1, claim, has been amended and claims 2-52 have been added in the preliminary amendment filed on May 24, 1999. In the amendment filed on September 8, 2000, claim 47 has been canceled, and claims 1, 11, 20, 24, 34, 43, 46, 48, 49, and 50 have been amended. In the amendment filed on May 23, 2001, claims 1, 11, 20, 24, 34, 43, 46, and 50 have been amended. In the amendment filed on February 27, 2002, claims 1, 11, 20, 24, 34, 43, 46, 50, and 52 have been amended. Therefore, claims 1-46, and 48-52 are under prosecution in this application.

Summary of Office Action

3. Applicants' amendment filed on February 27, 2002 have been fully considered, the pending claims 1-46, and 48-52 are rejected as being unpatentable over the art cited below, and Applicants' request for allowance is respectfully denied.

Response to Applicant's Amendment

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 1-4, 6-13, 15-22, 24-27, 29-36, 38-46, and 48-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuda et al. US Pat. No. 5,794,116.

Claims 1-4, 6-13, 15-22, 24-27, 29-36, 38-46, and 48-52, Matsuda teaches a method and a corresponding system as discussed in paragraphs 5-8 of paper No. 12. Further:

Matsuda teaches the steps of transmitting information about available items as a first wireless transmission, and retransmitting said information about said available items as a second

Art Unit: 3624

wireless transmission (column 3, lines 1-7).

Matsuda fails to teach that the information not being received as a result of a request from said customer device.

Official Notice is taken that transmitting information without a request from a receiving device is old and well known in the art, for example pushdowns in client-server systems are well known, a server is able to pushdown information and data to a client without transmitting a request signal for the information from the client.

It would have been obvious to one of ordinary skilled in the art at the time the Applicant's invention was made to modify the teachings of Matsuda to include that the information about available items not being received as a result of a request from said customer device because, Matsuda performs the step of continuously transmitting a signal in a wireless communications network to a wireless video terminal, one of ordinary skilled in the art would be motivated to do so, because it provides convenience to the user by eliminating the requesting step by the user, and it greatly improves the marketing aspects of the system by advertising a available items.

7. Claims 5, 14, 23, 28, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuda et al. US Pat. No. 5,794,116 in view of Camaisa et al. US Pat. No. 5,845,263 as discussed in paragraph 9 of paper No. 12.
